

INSTRUCTIONS FOR POSTERS

The New Zealand Plant Protection Society publishes original research papers on all aspects of biology, ecology and control of weeds, vertebrate and invertebrate pests, and pathogens and beneficial micro-organisms in agriculture, horticulture, forestry and natural ecosystems. Short reviews may be published as long as these are critical in nature and add significantly to plant protection science. It is a requirement that all papers and abstracts of posters published in our journal are presented at the Society's Conference. At least one of the contributing authors must be a current member of the New Zealand Plant Protection Society. Because **New Zealand Plant Protection** is pre-printed and circulated to delegates before the conference, submission deadlines must be strictly adhered to. For full details on the conference and submission of papers or posters, visit the Society's website at [www. nzpps.org](http://www.nzpps.org).

Submission of poster abstracts

Poster papers will be published as an extended abstract of no more than 200 words in the back of *New Zealand Plant Protection*. They can be used to report short complete work, negative results, interesting one-off observations, new techniques, etc. that do not justify a full paper. An electronic copy of the abstract must be emailed to the editor for publication by *15 May*. The format of the written abstract must follow the style used in *New Zealand Plant Protection* 54 (2001) or a subsequent issue.

Preparation of posters

Excellence in presentation is essential. Professional finish and standards are expected. Hand written material is not acceptable. Please consider the following points when preparing your poster.

- Poster board size is 1 m x 1 m.
- Ensure a gap of at least 30 mm between photographs, tables and word summaries.
- In general, the minimum size for photographs should be 150 mm x 100 mm unless compilations of photographs are used where a smaller size may be appropriate.
- Print size for headings should be at least 20 mm for upper case and 15 mm for lower case.
- Written information should be double spaced and in bold type at least 4 mm high. Use lowercase as much as possible.
- The word limit for scripts is 500 words.
- Scripts should only include the key points of methods, results and discussion/conclusions.
- Use bullet point form wherever possible.
- Explain the content of photographs briefly.
- Tables should be summarised to key points. An average of 10-15 numbers/entries per table is considered suitable.
- Authors are encouraged to include a 75 mm x 75 mm personal photograph (head only) in the upper right hand corner.

Presentation of posters

Posters must be set up no later than 10.30 a.m. on the first day of the conference. Poster boards are provided and will be available for setting up the night before. Velcro tape for attachment of your poster will also be provided. Authors must be available for discussion and queries during the poster session.
